Milan Design Week 7 - 12 June 2022

Marsotto edizioni presents:

CARO MARCO... the new collection designed by Niko Koronis

"The new marble furniture collection will be on stage during the Design Week from the 7th to the 12th of June at the Marsotto showroom – Largo Treves, 2 Milano.

Caro Marco... is the result of a collaboration with Niko that has been consolidated over time. Sharing values, passion for design and marble, is what inspired us to investigate new solutions, giving us an opportunity to carry out scrupulous research on different materials and finishes, while always keeping in mind the respect we owe to the material.

Caro Marco... is aesthetic harmony, careful balance between full and empty, lights and shadows, all enhanced by the natural beauty of new finishes which brings out the intricate and sculptural nature of marble but also the refined and elegant look of each item in the collection." – Marsotto

"There have been several inspirations behind the creation of this collection, but the two fundamental ones have been the skills and rich history of Marsotto, as well as the need to investigate new productive and aesthetic (visual and tactile) possibilities. The result is a family of furniture with a minimalist appearance, where sculptural forms are juxtaposed with sharp lines, and positive and negative volumes are in a constant dialogue. Each item of this collection is meticulously sculpted from a single block of e white Carrara marble and specially finished by hand." – Niko Koronis
